

Learning Resource Center

The Learning Resource Center is the gateway for the department to interact with the students of the department and maintain their record. It provides with various functionalities to the students, faculties, data entry operator and the administrator.

The students who are studying in the institute, the faculties who are a part of the department, the Data Entry Operator and the administrator are the users of this application. The database consists of student record, placement record, user details, files uploaded by the faculty related to various subjects in interests, notices announced by the department, files uploaded by the students related to solutions of the assignments, complete records of students' results.

The portal will provide:

1. The students to register themselves as a student of the institute upload their assignments, etc.
2. The faculties to upload the e-books related to their subjects
3. The administrator to upload notices, to modify subjects offered in particular semester and to monitor everything and make any changes.
4. The data entry operator to enter results of students, enter placement details, manage faculty and student details, various report generation of students results etc.
5. The end users can update their account also
